

DI

SCHEMA :

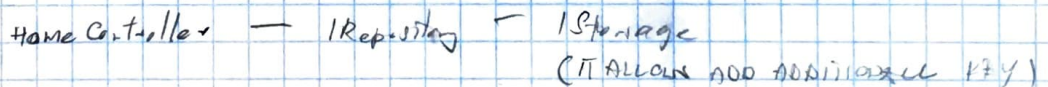

INSTEAD OF CHANGING EACH CONTROLLER (CHANGING A CLASS NAME - E.G. NewRepository INSTEAD OF Repository) IT IS NEEDED TO CHANGE THE CLASS NAME IN STARTUP FILE.

DEPENDENCY CHAIN:

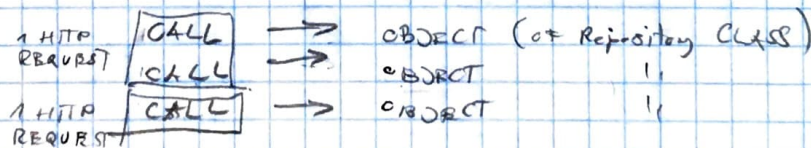

SO THE CHAIN OF DEPENDENCY LOOKS LIKE:

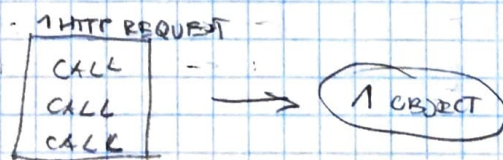

DI METHODS - E.G. < IRepository, Repository >

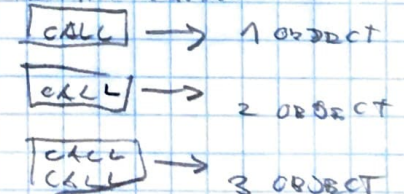

AddTransient - EACH CALL TO IRepository CREATES A NEW Repository CLASS INSTANCE.

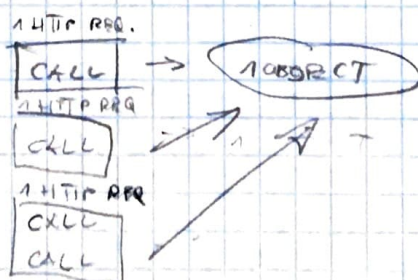

AddScoped -

MANY HTTP REQUESTS

AddSingleton -

From Services

It's possible to declare DI using ACTION HTTP66 instead constructor

CLAS

{

CONSTRUCTOR (INTERFACE)

...

}

ACTION HTTP66 ([From Services] INTERFACE)

...

}
